

**NOTICE TO SRI LANKAN MEDICAL STUDENTS STUDYING IN SLMC RECOGNISED
FOREIGN UNIVERSITIES**

**SIGN UP TO THE LIST OF SRI LANKAN MEDICAL STUDENTS IN RECOGNISED
FOREIGN UNIVERSITIES**

SLMC decided to maintain a database of Sri Lankan medical students in recognised foreign universities with relevant information listed in the Google form to streamline the overseas educational training programs and for future planning purposes.

Each student enrolled in a recognised foreign university but not graduated up to date, should complete the online form available at <https://forms.gle/UwAQhuuD4ATC18rXA> with the requested details on or before **31st August 2022**.

The new students who will register in the future in such universities too should complete the form immediately following enrollment in the degree programme.

Please note that the completion and submission of the form SHALL NOT be an endorsement of the degree programme nor approval of the degree. Each student shall be required to apply for degree approval following completion of the degree programme and receipt of the degree certificate as done presently. The degree will be approved based on the provisions of the Medical Ordinance, the Minimum standards regulations and completion of the approved degree programme fully. This will include the completion of clinical training onsite (physical). Obtaining degree approval is a must to register for the ERPM examination.

The SLMC shall not issue any letters based on the information provided nor such should be requested.
